CHEF KNIVES

Flair Professional Knives made of SCRMOV grade Stainless Steel material having 2.5mm Thickness

- Chef knife is usually one of the most important knives in a professional kitchen.
- The design of chef knife can vary widely depending on the type of food preparation task.
- These knives are heat treated to 55+ HRC.
- Chef knife is the area where SCRMOV really shines in itsts overall performance.
- One of the main reasons that SCRMOV has become so popular for kitchen knives, lower cost pocket and fixed blade knives is its excellent level of corrosion resistance.
- Along with being very easy to sharpen, it can achieve an incredibly high level of sharpness. It is quite easy, even for a novice user, to achieve a scalpel-like sharp edge.

ALMOND CUTS

Our premium almond cuts are perfect for Indian sweets, bakery products, ice creams, and confectionery. Manufactured in a fully automated, no-human-touch process, these finely cut almonds ensure hygiene, consistency, and superior quality. They add a rich, nutty flavour and a delightful crunch to any recipe. Whether sprinkled over desserts, blended into pastries, or layered in mithai, our almond cuts bring elegance and nutrition to your creations.

PRE-PRINTED EDIBLE WAFER CIRCLES

Tastycrafts Wafer Circles are made by printing theme based images on very thick wafer card with edible inks. Its diameter is 5.75" and is suitable for use on top of a sponge cake. It is an easy way to set theme of the cake and convey the required message. Unlike Sugar Sheets, Wafer circles are mildly sweet and thus helps maintain the taste of cake.

Catalogue for Pre-Printed Edible Wafer Circles is provided seperately.
Please contact us on Customer Care number for the catalogue.
Total designs 80+.

NOTE: It is advisable to add a layer of neutral gel or white chocolate between the baked goods and Tastycrafts wafer products to prevent transfer of moisture and helps to avoids sogginess of wafers.

FOOD ADDITIVES RANGE

Titanium Dioxide

Titanium Dioxide is a bright, tasteless white colour which gives excellent whiteness and opacity. It is commonly used in cake creams, icing, fondant and other confectionery products. It is safe for food use and provides bright, long-lasting colour.

PACK SIZE	INNER PACK
100gm / Bottle	12 Bottles
500gm / Pouch	20 Pouches
1kg / Jar	12 Jars
2.5kg / Jar	4 Jars

CMS Powder

Tastycrafts CMS powder is a food additive used as a thickener, emulsifying & anti-caking agent. It is also widely used in cake creams, icing, beverages, instant foods, ice-creams, pharmaceutical and cosmetic products.

PACK SIZE	INNER PACK
100gm / Bottle	12 Bottles
500gm / Pouch	20 Pouches
1kg / Jar	12 Jars
2.5kg / Jar	4 Jars

CMC Powder

CMC powder is a viscosity modifier or thickener, used to stabilise various food products including ice cream and fondant. It helps in binding and gives better structure to cake, bread and cake preparation.

How to use: CMC can be used in gluten free cooking to provide volume and viscosity. It is also used in candy preparation to ensure smooth dispersion of flavours and oils.

PACK SIZE	INNER PACK
100gm / Bottle	12 Bottles
500gm / Pouch	20 Pouches
1kg / Jar	12 Jars
2.5kg / Jar	4 Jars

Tylose Powder

Tylose powder is used as a binding agent with fondant to make gum paste and you can mix it with powdered sugar to use as a paste for edible flowers, toys and cake arts. It is mixed with fondant, sugar paste to add elasticity and decrease drying time.

How to use: Add 5g to 8g of Tylose powder with help of Vegetable Margarin to 500g of fondant or sugar paste. Knead it and allow it to rest overnight before using.

PACK SIZE	INNER PACK
100gm / Bottle	12 Bottles
500gm / Pouch	20 Pouches
1kg / Jar	12 Jars
2.5kg / Jar	4 Jars

Cream of Tartar

Cream of Tartar is often used as a major component in baking, combined with baking soda to react when the mixture is moistened to ensure that final food product will rise well. It acts as a leavening agent in cakes, breads and other baked products. It is also used in soft drinks, candies, bakery products and gelatin desserts commonly.

ISOMALT

SUGAR SUBSTITUTE

Tastycrafts Isomalt is a naturally sourced sugar replacer and the only one in its kind made from pure beet sugar. It is number one sugar replacer worldwide for hard candies. It is widely used in bakery industry both as a sugar replacer but more importantly for creating amazing objects from it like sugar curls, blown sugar, sugar sails, etc. Food colours can be added after cooking the Isomalt to create vibrant coloured sugar figures on the cake.

CAKE GEL

IMPROVER FOR BAKERY PRODUCTS

Cake Gel works as an emulsifier and stabilizer mix and provides standardized quality in sponge cakes and roll production. With Cake Gel, it is easier to make mouth-filling cakes and sponge cakes with high volume and smooth pore structure. It increases volume, improves texture and extends shelf-life.

- Make mouth-filling cakes
- Provides high volume and smooth pore structure
- Standardized quality in sponge cakes
- Increased volume

ICING NOZZLES (TIPS): STAINLESS STEEL 304
WITH COLLAR RING

Noor Icing Nozzles are made from high quality S.S. 304 with collar rings or beading. They are manufactured with utmost precision so as to give any decoration the clear outline of pattern which makes it into a work of distinction. The patterns made by nozzles can be varied according to the angle at which the nozzle is held and the amount of pressure used on the handle of the syringe or the bag. Moving speed and direction also varies the pattern - for instance, a zig zag movement with a star nozzle gives cable effect.

CHEF KNIVES

Flair Professional Knives made of SCRMOV grade Stainless Steel material having 2.5mm Thickness

- Chef knife is usually one of the most important knives in a professional kitchen.
- The design of chef knife can vary widely depending on the type of food preparation task.
- These knives are heat treated to 55+ HRC.
- Chef knife is the area where SCRMOV really shines in itsts overall performance.
- One of the main reasons that SCRMOV has become so popular for kitchen knives, lower cost pocket and fixed blade knives is its excellent level of corrosion resistance.
- Along with being very easy to sharpen, it can achieve an incredibly high level of sharpness. It is quite easy, even for a novice user, to achieve a scalpel-like sharp edge.
